

Health & Safety Policy Statement

COMMITMENT

Sf Stefan Civil Engineering & Utility Contractors Ltd Managing Director commits to and formally endorse this Health & Safety Policy and will undertake to review this Statement and the Policy on an annual basis. SF Stefan also confirms its commitment to comply fully with the Health & Safety at Work etc. Act 1974 and all other relevant Health & Safety legislation.

In meeting our commercial objectives and the needs of our customers, we aim to achieve and maintain a high standard of health & safety for all our workers, our Contractors and for anyone who is involved in, or affected by, our activities.

Health & Safety obligations will be achieved through risk assessments and method statements, compliance with legislation, communications with workers, performance review by annual audits, and monitoring of accidents. SF Stefan also commits to provide appropriate resources including staffing, facilities including medical, welfare, work equipment, personal protective equipment (PPE), training (including refresher training), financial and other support including expert advice, where appropriate.

Consultation/communication on health & safety matters will take place through informal meetings, toolbox talks, notice boards etc. and mentoring. Core health & safety services will be provided by our recognised Health & Safety Consultants who will supply advice and/or attend meetings or sites, if required.

PLANNING FOR HEALTH & SAFETY

Health & safety is an integral part of how SF Stefan is managed.

Our Contractors, if used, will comply with their own and SF Stefan health & safety procedures which are aimed at achieving and maintaining high standards in health & safety performance.

SF Stefan may require our Health & Safety Consultants to inspect our premises and/or sites to ensure our work is conducted safely.

RESPONSIBILITIES

Ultimate responsibility for health & safety in SF Stefan rests with the Directors. However, everyone working in and with the business has a part to play in assisting us to meet our obligations. Our workers and our Contractors, if used, share a responsibility for their own health & safety, as well as for the health & safety of others who may be affected by their work and behaviour.

The arrangements for implementing this Policy and the specific responsibilities of managers and workers are set out in the Health & Safety Policy document

Stefan Voloseniuc
 Managing Director
